

Emergency Simulation Session

Debriefing is a long sequence in which the trainer encourages exchanges between participants to prepare them to transfer their learning to professional practice.

The training does not result in a certification evaluation .

However, a certificate of attendance will be given to each student at the end of the session.

See you soon in our simulation center!

Address : June 1st Street 5019 Monastir Tunisia

Emergency Ultrasound Workshops

Our medical team offers opportunity for emergency physicians to acquire managements of acute patients.

Workshops For Your Need

Designed to raise national and international scientific community technologies and emerging topics in acute clinical situations.

Our medical team is committed to animate several workshops :

- ◆ ECG interpretation
- ◆ Pain management
- ◆ Chest pain unit organization
- ◆ Non invasive ventilation
- ◆ Non vital trauma
- ◆ Medical communication

Emergency simulation training

Our simulation center offers to all health professionals the opportunity to reinforce their training in authentic contexts simulated programs.

Through scenarios that replicate different care situations, learners train to solve clinical problems and update their knowledge.

Situations can be complex (teamwork , acute situations , caring relationships ...) or technical (training gestures and standardized procedures).
